Climate Change

Finland

May - June 2015

1. COUNTRY HIGHLIGHTS

Finland is one of the three Member States (along with Denmark and Sweden) where respondents say that climate change is the most serious problem facing the world (26%, EU average: 15%).

Close to two-thirds say that it is a "very serious" problem (65%), a nine percentage point rise since 2013. More than half believe that business (53%) and the government (51%) are responsible for tackling climate change. A high proportion also thinks that the European Union and citizens themselves are responsible (both 38%).

Two-thirds of respondents say they have taken some action to fight climate change in the past six months (66%, EU average: 49%). When specific measures are mentioned, however, this figure rises to 96%. Actions include:

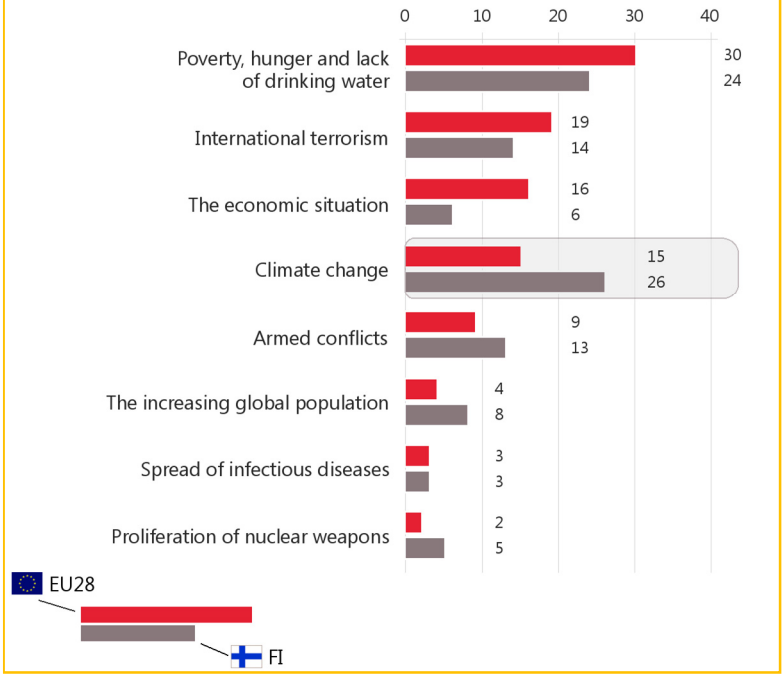
- 80% (+7 percentage points since 2013) try to reduce waste and regularly separate it for recycling
- 67% try to cut down consumption of disposable items whenever possible (+12 percentage points since 2013)
- 53% buy locally produced food whenever possible (+15 percentage points since 2013)

There is a clear consensus (91%) that fighting climate change will only be effective if all countries of the world act together. There is also strong support for national action to increase the use of renewable energy (95%) and improve energy efficiency (91%) by 2030.

2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

QA1a Which of the following do you consider to be the single most serious problem facing the world as a whole?

(%)



QA1T Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS)
