Methodology: face-to-face

1. COUNTRY HIGHLIGHTS

More than seven in ten respondents in Belgium think that climate change is a 'very serious' problem (73%), an increase of 3 percentage points (pp) but below the EU average of 79%. Almost a quarter (23%, in line with the EU average of 23%) see it as the single most serious problem facing the world – an increase of six pp since 2017.

Belgium is one of only two countries where respondents most often say that the EU is responsible for tackling climate change (64%, significantly above the EU average of 49%).

More than six in ten of those surveyed say that they have personally taken action to fight climate change in the past six months (63%, just above the EU average of 60%), which is an increase of 16 pp since 2017. However, when given specific examples of the kinds of actions, which count as climate actions, this proportion increases to 98% (vs the EU average of 93%).

- Respondents in Belgium are now much more likely than they were in 2017 to say that they regularly use environmentally-friendly alternatives to their private car (44%, which represents an increase of +14 pp since 2017, and is significantly higher than the EU Average of 37%).

- The proportion of respondents who take lower energy consumption into account when buying household appliances has increased by 12 pp since 2017 and now stands at 58%, well above the EU average of 48%.

The proportion who agree that adapting to the adverse impacts of climate change can have positive outcomes for citizens in the EU is 79%, again, significantly above the EU average of 70%.

The proportion of respondents in Belgium who agree that greenhouse gas emissions should be reduced to a minimum while offsetting the remaining emissions, in order to make the EU economy climate neutral by 2050 is in-line with the EU average (93% for Belgium and 92% for the EU as a whole).

2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

QB1a Which of the following do you consider to be the single most serious problem facing the world as a whole?
(%)

QB1T Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS)
